

StarBand introduces a completely revamped product line, featuring the new StarBand Nova Series. The StarBand Nova Pro and StarBand Nova Ultimate are based on a new generation of technology (the Gilat SkyEdge™ platform) and are being offered at StarBand's lowest price point ever!

This is StarBand's biggest technology and price/performance leap in StarBand's history. These new services represent the melding of Spacenet's high-end VSAT experience and StarBand's consumer satellite know-how to create our highest-quality service ever.

The new StarBand Nova Series replaces the current Model 48x product line and all previous POE options. New and upgrading customers will be able to take advantage of our highly competitive new offerings, with more add-ons and opportunities to come during Fall 2006.

Top Reasons to Buy the StarBand Nova Series

- **StarBand's most competitive offering ever:** \$299 for new equipment, packages as low as \$49.99 (Nova Pro) or \$129.99 (Nova Ultimate) for professional-grade service
- **Next-generation VSAT technology** that is a generation ahead of the old 48x platform, the SkyEdge supports faster speeds and more functionality
- **Simpler installation and troubleshooting** with a new on-board web-based installation and configuration interface
